

## **OLT Offshore LNG Toscana: Richard Fleischmann new Managing Director**

*Livorno, October 23<sup>rd</sup> 2017* – OLT Offshore LNG Toscana announces that Richard Fleischmann is the new Managing Director of the company, representing Uniper shareholder. Formerly Senior Project Manager for the E.ON Group and later for Uniper Global Commodities, Richard Fleischmann will support Alessandro Fino – Managing Director representing Iren shareholder – and he will replace Silvano Calcagno whom was asked by Uniper to follow other projects of the Group.

OLT Offshore LNG Toscana would like to address a sincere thanks and appreciation to Silvano Calcagno for the work done and once again congratulate him for the new assignment.

Fleischmann has joined the E.ON Group (formerly Ruhrgas AG) as Head of Gas Supply Engineering in 1998 and in 2009 he became Member of the Board of Directors in the co-controlled shareholding Baumgarten-Oberkappel Gasleitungsgesellschaft. After divestment in 2013 he returned to the headquarters of E.ON Global Commodities SE at Düsseldorf and was assigned the coordinators' role managing the Nord Stream asset for E.ON; lately, after separation from E.ON he proceeded with this responsibility at Uniper Global Commodities.

Richard Fleischmann gained a Master's degree in Mechanical Engineering with focus on projecting industrial and power plants from Karlsruhe University in 1983. Since 2004 he holds a postgraduate Master of Business Administration in International Business from the former Management Institute of Nuremberg Georg-Simon-Ohm University.

***OLT Offshore LNG Toscana S.p.A.***, set up from the association of Iren Group (49.07%), Uniper Global Commodities SE (48.24%) and Golar LNG (2.69%), holds the property of the floating regasification Terminal "FSRU Toscana" and it is responsible for the related operation management. "FSRU Toscana", moored about 22 km off the coasts between Livorno and Pisa, is connected to the national grid through a 36.5 km long pipeline, operated and managed by Snam Rete Gas, of which: about 29.5 km at sea, 5 km in the floodway and the remaining 2 km on dry land. At full capacity, the Terminal has a regasification capacity of 3.75 billion cubic meters a year, about 4% of the national gas consumption.
