

OLT Offshore LNG Toscana

Regasification capacity available for December 2017 following activation of the Italian Emergency Plan by the Ministry of Economic Development

Livorno, 12th December 2017 - Following the activation of the Italian Emergency Plan by the Ministry of Economic Development, OLT Offshore LNG Toscana makes known that, by way of derogation of the Regasification Code currently in force, the slot n. 9, 21/12/2017 is again available for allocation.

For any further information please refer to OLT website www.oltoffshore.it

OLT Offshore LNG Toscana S.p.A., set up from the association of Iren Group (49.07%), Uniper Global Commodities SE - formerly E.ON Global Commodities SE- (48.24%) and Golar LNG (2.69%), owns and manages the floating regasification Terminal "FSRU Toscana". The Terminal, moored about 22 km off the coasts between Livorno and Pisa, is connected to the national grid through a 36.5 km long pipeline, operated and managed by Snam Rete Gas, of which: about 29.5 km at sea, 5 km in the floodway and the remaining 2 km on dry land. At full capacity, the Terminal has a regasification capacity of 3.75 billion cubic meters a year, about 4% of the national gas consumption.
