

OLT: launch of the consultation on the proposal to amend the Regasification Code

Livorno, October 25, 2022 – OLT Offshore LNG Toscana announces the launch of the consultation on the proposal to amend the Regasification Code.

From October, 24 2022 it is possible to consult the proposed amendment of the Regasification Code concerning the update of the procedures required to unload volumes of LNG exceeding 155,000 liqcm, of the duration of the financial guarantees required for continuous capacity and, with reference to virtual liquefaction service, in the event that the quantities of gas involved in the PSV transaction are traceable to biomethane production, the possibility to recognize that equivalent quantities of LNG within the Terminal are identifiable as bio-LNG.

All interested parties can submit their comments by December 8, 2022.

The proposal to amend the Regasification Code published by the Company can be consulted in the commercial section of the website www.oltoffshore.it

***OLT Offshore LNG Toscana**, a company controlled by Snam and Igneo Infrastructure Partners, owns and manages the floating regasification Terminal "FSRU Toscana". The Terminal, moored about 22 km off the coast between Livorno and Pisa, is connected to the national grid through a 36.5 km long pipeline, operated and managed by Snam, of which: about 29.5 km at sea, 5 km in the floodway and the remaining 2 km on dry land. "FSRU Toscana" has a maximum authorized regasification capacity of 3.75 billion Sm³ a year, about 5% of the national gas requirement.*
