

FSRU Toscana Regasification Terminal

List of LNG Carriers currently compatible and/or pre-approved according to LNG carrier Approval & Vetting Procedure

The ships herein listed can be considered pre-accepted or accepted only if no variation of the acceptance conditions have followed the compatibility process, in any case all subject to Final Acceptance and Discharge Test (as per Clause 2.1.1 of the Regasification Code). So, for the sake of clarity, since any structural modification or change of equipment (such as mooring lines or tails) made on a ship after the compatibility process can jeopardize the pre-acceptance or acceptance of such ship, all the ships herein listed shall be mandatory re-checked before being called at the Terminal (consistently with Clause 2.2.1.4 of the Code, to be applied to any material change affecting, even potentially, the compatibility of a pre-accept ship).
